New National First-class Undergraduate Specialty Construction Sites in JAI

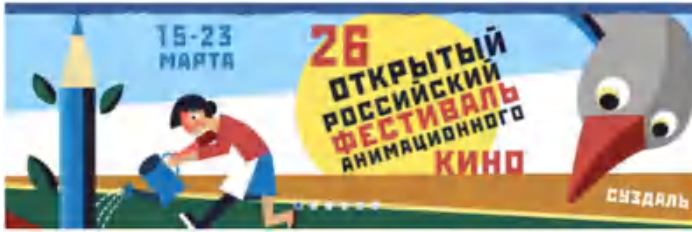

The General Office of the Ministry of Education issued the “Notice On Publishing The List of National and Provincial First-class Undergraduate Specialty Construction Sites in 2020”, announcing the list of “First-class Disciplines” construction sites of first-class undergraduate specialty in 2020. Digital Media Art of JAI has been approved as the national first-class undergraduate major construction site, and Environmental Design has been approved as the provincial first-class undergraduate specialty construction site.

The two majors were shortlisted for the first-class undergraduate specialty construction site, which is not only a major construction achievement of JAI in the first year of the 14th Five Year Plan, following the new situation of higher education, deeply implementing the Communist Party of China’s education policy and the fundamental task of “cultivating morality and talents”, but also a major achievement of adhering to the integrated school running mode of Education, Research and Industry.

JAI Animation Short-10000 Ugly Inkblots Won Three Awards at The Open Russian Festival of Animated Films

The 26th Open Russian Festival of Animated Films officially ended in Russia on March 23, 2021, our short film “10000 Ugly Inkblots” was awarded as Critics' Choice--Best Film of 2021 (the White Elephant Prize) , the 1st place in the professional rating, and the Unique Mastery of The Animation Art.

The Open Russian Festival of Animated Films was established in 1996. This festival is one of the three top Russian film festivals. The festival is sponsored by the Russian Ministry of Culture and organized by the Russian Animation Association. It gathers major animation companies from Moscow, St. Petersburg, Novosibirsk and other places to display their works and communicate together.

“10000 Ugly Inkblots” was directed by our guest professor and famous Russian animation director Dmitry Geller who led the joint creation of teachers and students of JAI. Since 2010, Professor Dmitry Geller has visited JAI for many times, he led teachers and students to create “Mice Burying A Cat”, “The Pond Under The Great Wall”, “Fish, Swimmer, Boat” and many other excellent animation works, the work “Mice Burying A Cat” won the Best Film Award at the 14th Hiroshima International Animation Festival.

Debut Win of Student from School of Game of JAI in Participating Global Game Jam

On January 31, 2021, Global Game Jam Online (GGJ Online), an annual international game development event, came to a successful conclusion after 48 hours of extreme challenges for participants from all over the world. The world's largest Game Jam, "GGJ", started in 2009 and has grown in size every year since. It is now the largest game creation event in the world.

With the great assistance of International Cooperation and Development Center, after careful organization and deployment in the early stage, 7 students were selected by School of Game to participate successfully.

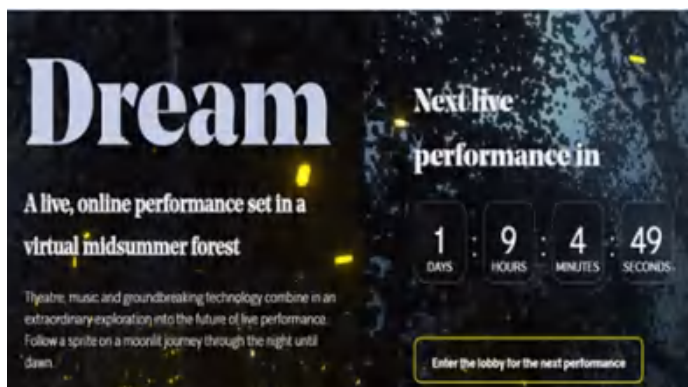

In this competition, Qi Chengwei, a Grade 2020 Digital Media Art major student from School of Game, and his team players completed the game "Finding Friendlyz", which won the Most Innovative Game Award in GGJ Online Hong Kong.

School of International Visual Effects of JAI Enjoy Online Interactive Experience & Impassioned Discussion

On the morning of March 17, 2021, all teachers of School of International Effects participated in the online interactive experience "Dream Online" activity organized by the University of Portsmouth, an cooperation partner of JAI.

This performance was a collaboration between the University of Portsmouth in the United Kingdom and the Manchester International Arts Festival, the Marshmallow Laser Feast, and the Philharmonic Orchestra, and was supported by the team of the School of Creative and Cultural Industries of the University of Portsmouth.

This event not only broadened the international vision of our teachers but also fully experienced the perfect fusion of technology and art while appreciating cutting-edge technology. The prospect of motion capture was very worthy of our animators' expectations. With the development of science and technology, motion capture, virtual reality, artificial intelligence, and other technologies will reach new technological heights in the future, and this also means that our faculty also needs to continue to update the knowledge structure, maintain a cutting-edge professional vision and a keen professional sense, have excellent professional skills and studying goals that keep pace with the times.

Youth Inspirational Movie “The Gate of Dream” Officially Launched & Exclusively Broadcast on Tencent Video

Today, the campus youth inspirational film “The Gate of Dream”, jointly created and produced by Jilin Animation Institute and Jilin Vixo Pictures Co., Ltd., was exclusively launched in Tencent Video. The film, starring Niu Baoyi , Chen Yichen, Ma Zhe, Zhang Yunyue, Lin Li, Li Songci and Zhou Hang, tells the story of five beautiful girls who are about to enter the society from the ivory, a 21-day dream-catching journey started by a mysterious online game.

The biggest attraction of the film is the collision between the game setting of punishment and the culture of the second-dimensional house dance, offering a visual enjoyment to the audience. What kind of secrets are hidden behind the dangerous game "The Gate of Dream"? What's the unspeakable secret when the college hunk helped Xia Xiaoman clear customs free of charge? The realistic thinking behind the layers of suspense reversal in "The Gate of Dream" also left the audience with a full aftertaste.
